

## Product Care Instructions:

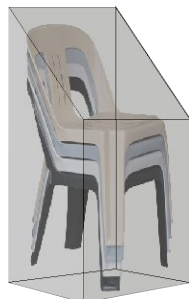

- Unique Patio Furniture Covers are virtually maintenance-free and easily cleaned.
- As with all pvc products the covers are subjected to natural wear. To maintain a longer product life follow these care instructions:
- To prevent dirt build-up, PVC should be routinely wiped down every 2 weeks to 1 month with a soft, lint-free, dry cloth or duster. If the PVC requires a deeper cleaning, use a damp, lint-free cloth with diluted dishwashing liquid and gently rub the affected area. Leave to dry before covering furniture.
- Be careful not to chafe/rub the cover against rough surfaces eg. brick walls, your design will rub off and the PVC will parish.
- PVC covers should be stored lying flat with nothing placed on top of them, or they can be stored upright with additional support (like cardboard). Take care not to fold the cover too tightly as it may crack on folds.
- Although the covers have been UV varnished, try to avoid leaving them in direct sunlight as designs will fade faster when exposed to direct sunlight for long periods of time.
- Do not cover a braai after use if it is still hot, and clean braai before covering it.
